### **DETAILED ACTION**

The amendment filed May 11, 2006 has been received and entered. Claim 1 has been amended. Claim 1 is pending in this application.

#### ***Response to Amendment***

#### ***New Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The amendment to the claim to define the dosage amount of the methotrexate to between 1 and 3 mg/kg appears to be new matter. Page 8 of the instant specification describes dosages as low as 0.1 mg/kg and dosages as high as 250 mg/kg. There does not appear to be a dose that particularly points to between 1 and 3 mg/kg. Further, one skilled in the art would have been motivated to prepare additional useful dosages of the ranges taught by the prior art. While the reference is silent regarding some dosages, the difference in dosage amount will not support the patentability of subject matter encompassed by the prior art unless there is evidence indicating such dosage amount is critical and differs significantly from the prior art.

Art Unit: 1614

When the general conditions are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation. In re Aller, 220 F.2d 45, 105 USPQ 233, 235 (CCPA 1955). In the absence of any criticality and/or unexpected results of the dosage ranges claimed, the instant invention is considered obvious.

### ***Response to Arguments***

Applicant's arguments filed May 11, 2006 have been fully considered but they are not persuasive. The rejection made in the paper mailed February 13, 2006 under 35 U.S.C. §103(a) over Chamberlain et al. is maintained and hereby repeated for the reasons set forth in the previous office action and those set forth below.

Regarding the dosage of methotrexate recited in Chamberlain et al., applicant's arguments are drawn to a human. The instant claims are drawn to an **animal** having lower back pain with radiculopathy. If the animal weighs 4.4 lbs (2 Kg), and the dosage is 1mg/kg, as in the claims as amended, the amount to be administered would be 2 mg per dose as in Chamberlain et al.

Thus the claims fail to patentably distinguish over the state of the art as represented by the cited references.

Accordingly, for the above reasons, the claims are deemed properly rejected and none are allowed.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
